LIGHTHOUSE

REG SCANNING & ROUTAGE

Regulatory Horizon Scanning has become a critical activity for firms, as the plethora of regulatory publications increases.

Despite the level of resources allocated by **Compliance** Functions to perform this activity, many challenges remain.

In order to help firms, Aurexia has developed a cutting-edge tool to better monitor Horizon Scanning, helping firms to **reduce risk** in a more **cost efficient** way.

If you would like to discuss any of these announcements in more detail, or **to benefit from a presentation of our LightHouse tool**, please reach out to our local Aurexia teams at expertise.lux@aurexia.com.

Aurexia is proud to present **LIGHTHOUSE**, a regulatory horizon scanning and routage tool.

15%

Time spent weekly by Compliance Officers to track and analyze regulatory developments

3x

More time spent weekly by Compliance Officers updating policies (from 9% in 2017 to 26% in 2019)

6.6x

Growth in number of alerts from 2008 to 2018

220

Average global regulatory intelligence alerts
