LIGHTHOUSE

REG SCANNING & ROUTAGE

Regulatory Horizon Scanning has become a critical activity for firms, as the plethora of regulatory publications increases.

Despite the level of resources allocated by Compliance Functions to perform this activity, many challenges remain.

In order to help firms, Aurexia has developed a cutting-edge tool to better monitor Horizon Scanning, helping firms to reduce risk in a more cost efficient way.

If you would like to discuss any of these announcements in more detail, or to benefit from a presentation of our LightHouse tool, please reach out to our local Aurexia teams at expertise.lux@aurexia.com.

Aurexia is proud to present LIGHTHOUSE, a regulatory horizon scanning and routage tool.

15%

Time spent weekly by Compliance Officers to track and analyze regulatory developments

3x

More time spent weekly by Compliance Officers updating policies (from 9% in 2017 to 26% in 2019)

6.6x

Growth in number of alerts from 2008 to 2018

220

Average global regulatory intelligence alerts
